

HP Compaq Business Notebook nx9110

HP recommends Microsoft® Windows® XP Professional for Mobile Computing

Get the performance features of a desktop with no sacrifices through the new HP nx9110 notebook. Exceed your business goals with powerful Intel® Pentium® 4 processors, latest integrated ATI® Mobility™ Radeon™ 9000 graphics, integrated wireless capabilities, and innovative solutions including the 5-in-1 Media Reader. The power of this notebook goes even further with its 15.4" widescreen/wide-angle viewing displays. The innovative design of the HP Notebook Expansion Base eliminates the need for a separate monitor while making it easy to connect to a broad range of peripherals. All of these features combined keep you productive without having to compromise – finally a desktop PC that you can take with you.

Wide-Screen productivity

The HP nx9110 offers a stunning 15.4-inch widescreen display with high contrast and exceptional clarity. Extra-wide viewing angles provide a range of vision that is 33% greater than comparable standard panels – making information easy to read and easy to share. Widescreen displays increase productivity by viewing two applications side by side such as Microsoft® Word documents and an increased spreadsheet viewing area. The large and bright widescreen display of the nx9110 combined with the HP Notebook Expansion Base eliminates the need for a traditional bulky CRT monitor.

Instantly connect to your peripherals

The new and innovative HP Notebook Expansion Base port replicator makes the most of your desktop space offering you a clean, efficient and less cluttered work environment. You can combine a keyboard and a mouse with the Notebook Expansion Base for a complete desktop setup gaining instant access to a broad range of peripherals including printers, scanners and digital cameras. The Notebook Expansion Base eliminates the need to purchase a separate monitor, port replicator, external speakers and a USB hub.

Maximise performance

The HP nx9110 notebook is designed to deliver true desktop performance while offering the advantages of a space-saving mobile design. To work with advanced applications, the nx9110 is equipped with the latest Intel Pentium 4 processors with Hyper-Threading Technology running at 3.2GHz (800MHz front side bus). The award-winning integrated ATI Mobility Radeon 9000 graphics with up to 128MB of video memory significantly enhances visual experience in demanding 2D and 3D applications. Using the integrated DVD+RW drive, you can store your information securely on large and long-lasting 4.7GB RW/R discs.

Enhanced connectivity

The HP nx9110 offers you a breadth of built-in communications solutions to give you the flexibility you need to achieve maximum productivity in a daily changing business environment. Integrated wireless 802.11b/g LAN provides next-generation throughput performance while being backwards compatible with 802.11b devices. Bluetooth™ allows you to wirelessly synchronise and share data between other Bluetooth enabled devices such as PDAs, printers and mobile phones. All nx9110 series notebooks feature integrated 10/100 LAN and a 56K (V.92) modem for no-compromise connectivity.

Collaborate with colleagues easily

New technologies present creative ways to create, share and archive data, and facilitate flexibility in moving content around. The integrated 5-in-1 Reader is the perfect feature for quick file sharing from a digital camera to your printer. This reader supports SD memory, MMC, MS, MS PRO, and SM. USB 2.0 and Firewire (IEEE 1394) provide faster connections to external devices such as hard drives and digital cameras - making sharing large files quick and simple. Benefit from broad choice of expansion ports you can expect from a full-featured notebook: parallel, TV out, VGA, 1 Type II PC Card.

Full-Featured mobile desktop with enhanced connectivity
